

@ajaykr2712

Title: Configure a Kubernetes Cluster on Cloud with Helm good first issue
#19 opened 2 weeks ago by ajaykr2712
@ajaykr2712

Title: Set Up a CI/CD Pipeline Using GitHub Actions good first issue
#18 opened 2 weeks ago by ajaykr2712
@ajaykr2712

Title: Create a Kubernetes Cluster Locally with Minikube good first issue

Extract only the issues and remove the redundant extra info

1. Disaster Recovery for a Cloud Application
2. Secrets Management for CI/CD Pipelines
3. Auto-Scaling Feature for E-Commerce Platforms
4. Cost Monitoring Dashboard for Cloud Resources
5. DevOps Workflow for Microservices
6. Serverless Application Deployment
7. Log Monitoring and Alerting System
8. Dynamic Load Balancer Using Kubernetes
9. Infrastructure as Code (IaC) for Multi-Cloud Deployment
10. Automated CI/CD Pipeline for Web Applications
11. Optimize Docker Images for CI/CD Pipelines with Caching and Layers
12. Implement Docker Secrets Management for Sensitive Data
13. Set Up Docker Swarm Cluster for Load Balancing and Service Discovery
14. Dockerize a Complex Web Application with Multiple Containers
15. Build and Push a Multi-Stage Dockerfile for a Microservices Architecture
16. Integrate GitHub Actions with Terraform for Infrastructure as Code
17. Implement Git Flow Workflow for Team Collaboration
18. Implement a Git Hook for Pre-Commit and Pre-Push Validation
19. Set Up a Multi-Branch CI/CD Pipeline Using GitHub Actions
20. Implement a Git Submodule for a Multi-Repo Project
21. Set Up Network Policies in Kubernetes
22. Automate Docker Image Builds with Jenkins
23. Configure a Kubernetes Cluster on Cloud with Helm
24. Set Up a CI/CD Pipeline Using GitHub Actions
25. Create a Kubernetes Cluster Locally with Minikube
